KJ-875™ KJ-975™ TOPPER™

These racks give the circulator versatility to sell Saturday and Sunday papers from the same rack. Large capacity for that high volume location was the intended idea when the KJ-875™ and KJ-975™ were designed. These racks offer the capability to join with another publication where space is at a premium.

We highly recommend that this rack be bolted down. The holes in the base have been designed to be tamper proof. With the built in features and design concept, you will enjoy the ease of maintenance. The Slide-In™ insert with a built in coin box is a favorite with rack repair personnel in extremely cold weather. These racks can be fitted with a Power door closer™ for customer safety.

All K-Jack newsracks are designed to operate with a standard K-Jack mechanical snap-out™ mechanism or our electronic Comp-U-Mech™ mechanism.
